TNC

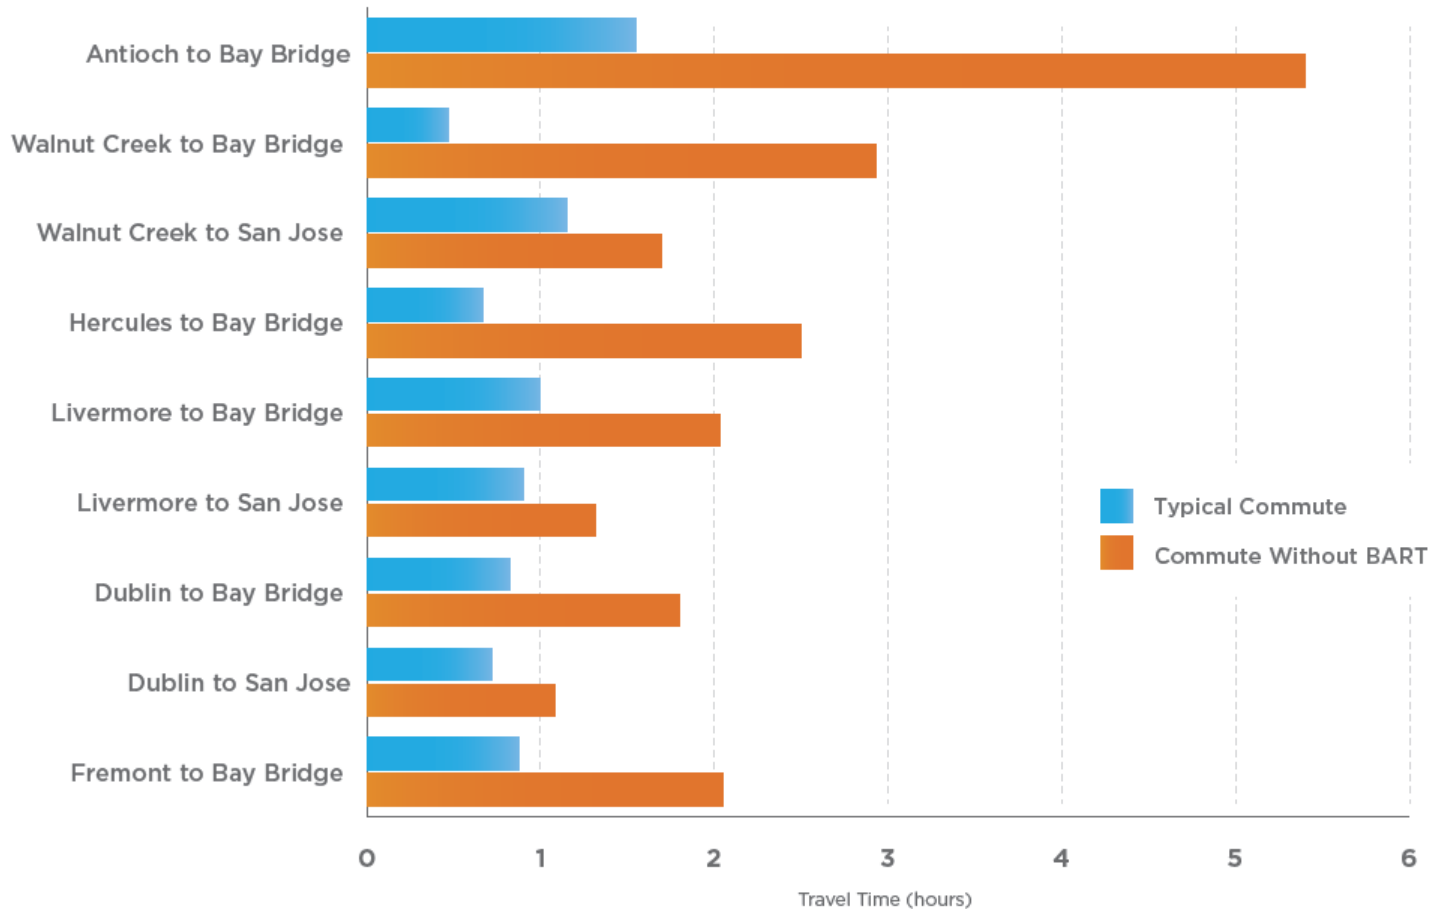

Automated
Vehicle

Space is a scarce resource

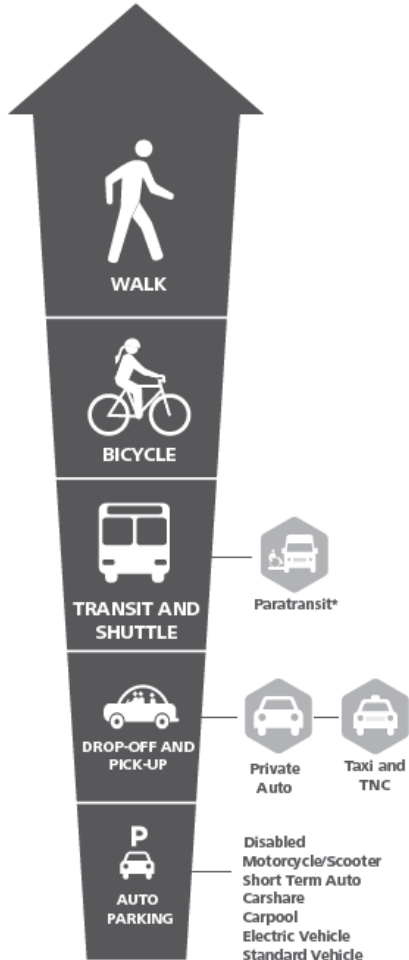

Freeway Travel Times *With* and *Without* BART

Source: Cambridge Systematics, 2016. Estimates developed using the MTC travel demand model 2010 base year with and without BART and adjusted to match 2016 conditions. Assumes all BART riders would drive on parallel freeways if BART were not available. Assumes 50% of Bay Bridge users would use other bridges or stay home.

Walking and Transit Oriented Development

*All stations must be paratransit accessible

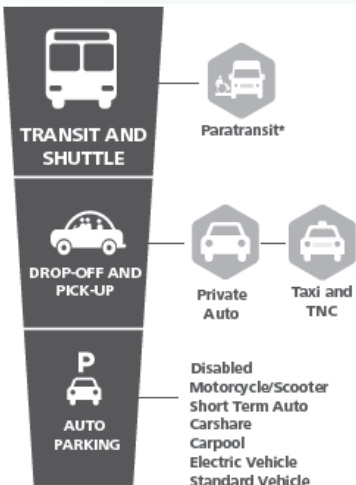

Transit and shuttles

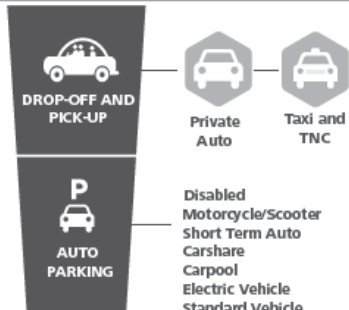

Chatham Waterfront Bus Station
